Direction of education:	70410102 –	Economics (by sectors and fields)

Module links

Module name:	Organization of production
Code (if applicable)	ICHTE1205
Courses (if applicable)	1
Module teaching semesters	2
Language	Uzbek
Curriculum relevance	Compulsory
Type of teaching, contact hours	Lecture, laboratory.
Workload	Total workload: 150 hours. Auditory hours: 60 hours; Lecture: 30 soat, laboratory: 30 hours; Self-study: 90 hours
Credit points:	5
Recommended previous subjects	Inclusive growth, Organization of innovations, Corporate strategy

Module objectives / expected learning outcomes	The course aims to provide students with a deep understanding of the macro- and meso-level determinants of production organization and development, as well as the policies influencing these drivers. At the same time, it seeks to develop knowledge and skills in identifying various factors of production organization using local and regional economic development theories and approaches, covering economic indicators ranging from innovations and human capital to knowledge diffusion and global networks. The objectives allow students to: • Understand the foundations for the development of production organization and be able to select the main strategies; • Evaluate production organization strategies and identify the advantages of successful strategies; • Develop and implement production organization strategies that confer regional development advantages; • Comprehend the phenomenon of production organization strategy, its characteristics, and regional specificities. Expected learning outcomes: Acquire skills in developing and implementing production organization strategies that provide development advantages, particularly in the context of regional growth; Gain the ability to ensure competitiveness in production organization, including skills in quality certification, standardization, and metrology systems; Develop competencies in assessing the impact of external and internal environments on strategy formation, reviewing business trends, drawing conclusions from regional economic potential, and effectively using strategic models.
Content	This course introduces students to the types of production organization and is taught during the first and second semesters of the first year. The aim of the course "Organization of Production" is to provide an introduction to production organization and to study the implementation of tasks within the framework of social economics.
Study and exam requirements	**a) To obtain 90-100 points, the student's level of knowledge must meet the following requirements:** - fully explain the essence and content of the subject; - maintain scientificity and logic in presenting the topics in the subject, avoiding scientific errors and confusion; - have a clear idea of the theoretical or practical significance of the subject materials in the subject; - demonstrate the ability to think independently within the scope of the subject; - can answer the questions asked clearly and concisely; - has carefully prepared the outline; - has completed independent assignments completely and clearly;

	- has fully mastered the laws and other regulatory and legal documents related to the discipline; - has published a scientific article on one of the topics related to the discipline; - can interpret historical processes; **b) To obtain 70-89.9 points, the student's level of knowledge must meet the following requirements:** - understands the essence and content of the subject, does not allow scientific and logical confusion in explaining the topics in the subject; - understands the practical significance of the content of the subject; - performs the assigned tasks and assignments within the framework of the curriculum; - can correctly answer the questions asked in the subject; - has carefully formulated a subject outline; - has fully completed independent assignments in the subject; - has mastered laws and other regulatory documents related to the subject. **c) To obtain 60-69.9 points, the student's level of knowledge must meet the following:** - has a general understanding of the subject; - has some intricacies in covering and presenting the topics in the subject in a narrow scope; - if the presentation is not smooth; - if complex and confusing answers are given to questions on the subject; - if the text on the subject is not well-formed. **d) In the following cases with a score of 0-59.9, the student's level of knowledge may be assessed as unsatisfactory:** - if there is no preparation for the subject exercises; - if there is no idea about the subject exercises; - if it is noticeable that the texts on the subject have been copied from others; - if serious errors and confusions are made in the text on the subject; - if the questions asked about the subject are not answered; - if does not know the subject.
