INSTITUTIONAL ECONOMICS
MODULE HANDBOOK

Field of study:	400000 –	Business, Management and Law
Area of education:	410000 –	Business and Management
Educational program:	60410100 –	Economics

Module Information

Module title	Institutional Economics
Code (if applicable)	INIQ1505
Course (if applicable)	2
Semesters	4
Language	Uzbek
Relation to the curriculum	Compulsory
Teaching type and contact hours	Lecture, practical classes
Workload	Total workload: 150 hours Auditorium hours: 60 hours (Lectures: 30 hours, Practical classes: 30 hours) Independent study: 90 hours
Credits	5
Recommended prerequisites	Economic Theory, History of Economic Thought

Objectives / Expected Learning Outcomes	The purpose of the module is to teach students the theoretical foundations of institutional economics, the formation and development of economic institutions and their impact on economic processes, the functions of formal and informal institutions, the nature and mechanisms of institutional constraints affecting economic behavior, and to develop practical skills to apply this knowledge. As a result, students will be able to: • know and understand key terms, concepts and theoretical approaches in institutional economics; • analyze the impact of property rights, transaction costs, contracts, incentive systems, formal and informal institutions on economic decision-making; • apply institutional analysis tools, evaluate the activity of economic organizations, identify the effectiveness of institutions and their influence on economic outcomes; • present scientific and practical ideas on institutional economics logically and coherently in written and oral form; • apply institutional approaches in economic research, policy-making and economic activity analysis. Expected Results 1. Theoretical knowledge and concepts: students will master key concepts such as institutions, organizations, transaction costs, property rights, contract theory, incentive systems, formal and informal institutions. 2. Analytical skills: students analyze the impact of institutions on economic efficiency and institutional factors of economic behavior. 3. Use of research and analytical tools: students learn institutional diagnostics, transaction cost analysis, contractual relations evaluation, and working with graphs and tables. 4. Students develop skills of expressing ideas accurately and logically using academic language. 5. Students apply institutional economic principles to real economic problems and develop policy recommendations.
Content	This subject, being one of the modern branches of economics, aims to explain the formation and development of economic institutions and their impact on economic processes. It examines formal and informal institutions, property rights, transaction costs, contracts, incentive systems and organizational activity, forming decision-making skills based on institutional approaches aimed at increasing economic efficiency.
