Field of knowledge: 400000 - Business, management and law
Field of education: 41000 - Business and management
Direction of education: 60410100 - Economics

Module links

Module name:	Labor Economics
Code (if applicable)	MEHIQ2605
Courses (if applicable)	3
Module teaching semesters	6
Language	Uzbek
Curriculum relevance	Compulsory
Type of teaching, contact hours	Lecture, laboratory.
Workload	Total workload: 150 hours, Auditory hours: 60 hours; Lecture: 30 hours, laboratory: 30 hours, Self-study: 90 hours
Credit points:	5
Recommended previous subjects	Fundamentals of Economics Economic Theory Macroeconomics Economic Security

Module objectives / expected learning outcomes	The purpose of the course is to teach students the theoretical foundations of economic knowledge, the key concepts and categories of economics, and the principles and laws governing economic processes, while developing their ability to apply this knowledge in practice. The objectives enable students to: Understand and master the terminology, concepts, and theories related to labor economics; Use key economic figures and interpret economic data; Apply economic analysis tools; Express economic ideas logically and clearly in writing; Apply economic concepts in existing economic research. Expected Learning Outcomes 1. Theoretical knowledge and concepts. Students will gain a comprehensive understanding of the fundamental concepts, categories, laws, and principles of economics. They will be able to correctly use economic terminology and interpret theoretical ideas. 2. Analytical skills. Students will learn to analyze economic processes using key economic indicators and figures. They will develop the ability to interpret, compare, and draw conclusions from economic data logically. 3. Use of research and analytical tools. Students will develop skills in economic analysis methods, including working with graphs and tables. They will learn to apply economic models and theories in practical situations. 4. Communication and expression skills. Students will be able to express economic ideas clearly, logically, and coherently in both written and oral forms. They will learn to support their arguments using proper academic language. 5. Practical application. Students will apply economic concepts to solve real-world economic problems. By studying existing economic research and experiences, they will derive theoretical and practical conclusions.
Content	This course serves as a fundamental basis in economics and is taught in the third year. The objective of the Labor Economics course is to study labor-related relations and the

	principles of wage calculation. Understanding the content of the course enables students to make entrepreneurial decisions, comprehend and develop economic policy, and, more broadly, to study contemporary economic activities.
Study and exam requirements	**a) To obtain 90-100 points, the student's level of knowledge must meet the following requirements:** - fully explain the essence and content of the subject; - maintain scientificity and logic in presenting the topics in the subject, avoiding scientific errors and confusion; - have a clear idea of the theoretical or practical significance of the subject materials in the subject; - demonstrate the ability to think independently within the scope of the subject; - can answer the questions asked clearly and concisely; - has carefully prepared the outline; - has completed independent assignments completely and clearly; - has fully mastered the laws and other regulatory and legal documents related to the discipline; - has published a scientific article on one of the topics related to the discipline; - can interpret historical processes; **b) To obtain 70-89.9 points, the student's level of knowledge must meet the following requirements:** - understands the essence and content of the subject, does not allow scientific and logical confusion in explaining the topics in the subject; - understands the practical significance of the content of the subject; - performs the assigned tasks and assignments within the framework of the curriculum; - can correctly answer the questions asked in the subject; - has carefully formulated a subject outline; - has fully completed independent assignments in the subject; - has mastered laws and other regulatory documents related to the subject. **c) To obtain 60-69.9 points, the student's level of knowledge must meet the following:** - has a general understanding of the subject; - has some intricacies in covering and presenting the topics in the subject in a narrow scope; - if the presentation is not smooth; - if complex and confusing answers are given to questions on the subject; - if the text on the subject is not well-formed. **d) In the following cases with a score of 0-59.9, the student's level of knowledge may be assessed as unsatisfactory:** - if there is no preparation for the subject exercises; - if there is no idea about the subject exercises; - if it is noticeable that the texts on the subject have been

	copied from others; - if serious errors and confusions are made in the text on the subject; - if the questions asked about the subject are not answered; - - if the subject does not know the subject.
Exam formats	Oral, written, test
Means used	Complete subject assignments and successfully pass current, midterm, and final tests.
